

NOV 16 2006

IN THE SPECIFICATION:

Please substitute the third paragraph on page 11 (and continuing on to page 12) of the specification, as originally filed, with the following paragraph:

A representative hardware environment for practicing the invention is depicted in Figure 6, which illustrates a typical hardware configuration of an information handling/computer system, used ~~in conjunction with the digital signal processor system 70~~ in accordance with the invention, having at least one processor or central processing unit (CPU) 10. The CPUs 10 are interconnected via system bus 12 to random access memory (RAM) 14, read-only memory (ROM) 16, an input/output (I/O) adapter 18 for connecting peripheral devices, such as disk units 11 and tape drives 13, to bus 12, user interface adapter 19 for connecting keyboard 15, mouse 17, speaker 24, microphone 22, and/or other user interface devices such as a touch screen device (not shown) to bus 12, communication adapter 20 for connecting the information handling system to a data processing network, and display adapter 21 for connecting bus 12 to display device 23. A program storage device readable by the disk or tape units is used to load the instructions, which operate the invention, which is loaded onto the computer system.
